

Project Features

- Preliminary Alternative Segment, Node, and Label
- Preliminary Alternative Segment Extension
- Proposed Lewis Creek Alternative Substation Site
- Running Bear Option D Siting Area
- Proposed Running Bear Substation Site
- Proposed Babel Alternative Switching Station Site
- 500 Feet Notification Zone
- Proposed 225 Feet Right-of-Way
- Display Board Matchline

Existing Utility Features

- Existing 69 kV Transmission Line
- Existing 138 kV Transmission Line
- Existing 230 kV Transmission Line
- Existing 345 kV Transmission Line
- Existing 500 kV Transmission Line

Cultural Features

- Cemetery and Boundary
- Official Texas Historical Marker

Land Use Features

- AM Communication Tower
- Communication Tower Other
- School
- Church
- Water Well
- Oil/Gas Well
- Oil/Gas Pipeline

Alabama-Coushatta Reservation

- National Forest
- National Wilderness/Preserve
- Wildlife Management Area
- Other Federal Land
- Park/Recreation Area

Transportation Features

- Private Airstrip
- Interstate Highway
- US Highway
- State Highway
- Farm to Market Road
- County/Local Road
- Railroad

Hydrologic Features

- River/Stream
- Waterbody
- NWI Mapped Wetlands
- 100-Year Floodplain

Administrative Features

- Municipal Boundary
- County Boundary
- Parcel Boundary

SETEX AREA RELIABILITY PROJECT

PRELIMINARY ALTERNATIVE SEGMENTS WITH ENVIRONMENTAL CONSTRAINTS

Date: 4/8/2024

Preliminary and Subject to Change

If approved, only one route (consisting of multiple route segments) from one of the proposed Babel Switching Station Options to one of the Proposed Running Bear Substation Options will be selected by the Public Utility Commission of Texas (PUCT). All routes and route segments in this notice are available for selection and approval by the PUCT.

Note: Some data sources (including property boundaries, easements, pipelines, wetlands, and other features) were obtained from third-party sources and are provided for informational purposes only. These data may not have been updated and should be used as a general guide to feature locations.

Digitization of initial preliminary transmission line segments was performed based on aerial interpretation of these features.

Some legend symbols are enlarged for easier identification.

Once an alternative route is selected and approved by the Commission, the approved version will be submitted to the public utility commission for final review and approval.
